Published by the Global Supply Chain Leaders Group

**SPECIAL EDITION:
CEO OF THE YEAR
PepsiCo's Indra K. Nooyi**

**PLUS:
RECOGNIZING
ORGANIZATIONAL CULTURE
IN MANAGING CHANGE**

WE ARE **Performance**
WITH **Purpose.**

Wanted: Successful Leaders With Heart And Purpose Not Only For Shareholders, But For All

As President of the GSCLG, I am delighted to present this year's awards edition of the Global Supply Chain Review. This month the GSC Review showcases the CEO of the Year, who has made the most significant contributions to the advancement of the supply chain industry.

In this issue we have also selected a great article on organization change. Why are these two related and why do we care? Culture change, be it at a personal level or in this case, at a global level, is created, changed or maintained by what we choose to hold true. If we only emphasize in making money, we will get individuals like Madoff and corporations like Enron, neither of which have any interest in others, but only in themselves.

When we celebrate business leaders with vision, passion, and care for their customers and employees we are rewarded with great leaders like PepsiCo's own Indra Nooyi. Such leaders balance the pursuit of the shareholders' value while ensuring that its customers get great products and employees get their dues as well.

The difference between those who profess to lead and care and those who do are their actions. If we recognize responsible actions, we will perpetuate an environment where strong leaders are the norm. If we don't value notable contributions then those who lead will remain exceptions to the rule. How many CEO's can you name who are capable of providing a balance between their obligations to be profitable and to do well for the community, the country, and the planet?

Being able to take care of your customer, employees, and the planet is not an easy task and leadership at this level deserves to be highlighted. But I would also give a bit of personal information on this subject. Leaders like Indra Nooyi demonstrate their sincerity when they go out of their way to ensure that the recognition does not fall on their shoulders but rather on the shoulders of all the employees who, day in and day out, are working to develop a great product and a better world for all of us. Such leaders share the spotlight; they give credit where credit is due.

Recently, we have been hearing corporate malfeasance after corporate malfeasance. Those who have stolen not just funds, but trust, dominate the headlines. Let's make room for something good to inject itself into our daily news intake. Let's celebrate this year's CEO of the Year and recognize her leadership.

If we support and reward leaders who care about their customers, employees, and environment as much as they do about profit, then all of us win. With this in mind we honor Indra Nooyi of PepsiCo and look forward to honoring many more like her in the future. Ms. Nooyi deserves this award and we deserve leaders that drive successful corporations with heart and purpose not only for shareholders, but for all.

Sergio Retamal

Recover Lost Revenue and Get a FREE Laptop No Risk - All Reward -- Guaranteed!!

www.global-4pl.com

We find the money. You reap the rewards, and track your savings with your new laptop!*

If your company does not have a post-audit of transportation payments in place, you're likely leaving money on the table. Global4PL's proven post-audit service finds errors in freight forwarder payments and recovers overpaid funds - hundreds of thousands of unexpected dollars for just one shipper.

We consistently achieve powerful results for satisfied clients, and analyze freight trends to recommend transportation and warehouse cost reductions and service improvements. Our seasoned team specializes in finding money where others do not even look.

Global4PL's post-audit is ideal for global shippers with a transportation 'spend' greater than \$500,000.

How much are YOU leaving on the table? Let us find it for you. It is your money.

Global4PL will:

- 🌐 Detect overcharges and unused / outstanding credits
- 🌐 Verify that only the correct amounts were paid
- 🌐 Verify that no duplicate payments were paid
- 🌐 Recover lost money
- 🌐 Improve your firm's cash flow
- 🌐 Free up your A/P and Supply Chain personnel

Contact Global4PL today to take advantage of this unique, risk free offer.

E-mail us at info@global-4pl.com or call us at 866.475.1120 to arrange your post-audit.

Be a hero. Recover money for your company and enjoy a new laptop to keep track of the savings.

No Recovery means No Fees / 100% ROI + Guaranteed!!

* If your company has a transportation spend of more than half of million dollars and you sign a post-audit agreement with Global4PL, we will send you a laptop. If your company spends less than a half million dollars in transportation, we have other gifts for you.

CEO of the Year

INDRA K. NOOYI
Chairman and Chief Executive Officer
PepsiCo

SANTA CLARA, Calif. - July 09, 2009 - The Global Supply Chain Leaders Group (GSCLG) has named Indra Nooyi, Chairman and Chief Executive Officer of PepsiCo (NYSE: PEP), 2009 CEO of the Year.

The CEO of the Year award is presented to the individual who received the highest aggregate ratings in leading, developing and maintaining sustainable, responsible business practices in its global operations.

Ms. Nooyi's key contributions include promoting and supporting socially responsible business practices, including taking on one of the planet's most pressing problems - climate change. Ms. Nooyi was also instrumental in the company's efforts to provide a wider portfolio of nutritious foods and beverages. Her commitment to global citizenship is evidenced by her multi-year growth strategy, "Performance with Purpose."

"I am honored that PepsiCo has received this recognition from the GSCLG," said Nooyi. "This award is a testament to the dedication of our 198,000 associates around the world who work tirelessly to grow our business and act as ethical and responsible citizens of the world."

Ms. Nooyi was named President and CEO of PepsiCo on October 1, 2006, and assumed the role of Chairman on May 2, 2007. She has directed the company's global strategy for more than a decade and led PepsiCo's restructuring, including the divestiture of its restaurants into the successful YUM! Brands, Inc.; the spin-off and public offering of company-owned bottling operations into anchor bottler Pepsi Bottling Group (PBG); the acquisition of Tropicana and the merger with Quaker Oats that brought the vital Quaker and Gatorade businesses to PepsiCo.

Prior to becoming CEO, Ms. Nooyi served as President and Chief Financial Officer beginning in 2001, when she was also named to PepsiCo's Board of Directors. In this position, she was responsible for PepsiCo's corporate functions, including finance, strategy, business process optimization, corporate platforms and innovation, procurement, investor relations and information technology.

The CEO of the Year Award recognizes industry leaders who have made extraordinary contributions in the areas of responsible corporate citizenship, the combat against global warming, involvement in social causes and creating jobs in America in a globalized economy.

We are pleased to name and to honor Indra K. Nooyi the 2009 CEO of the Year. Congratulations!

Complete Global Supply Chain Visibility in just one system.

**We connect their worlds
to make yours easier.**

Recognizing Organizational Culture in Managing Change

Structural changes can serve as the initial intervention for shifting culture.

Mark Mallinger, PhD, Don Goodwin, MBA, and Tetsuya O'Hara, MBA

Reprinted by permission from the Graziadio Business Report, Volume 12, Issue 1, 2009

<http://gbr.pepperdine.edu/091/culture.html>

The dramatic increase in products, markets, enhanced technology, and robust competition has led to a dynamic global business environment. Companies that have flourished in the 21st century are those that have learned to respond to turbulence by managing change effectively. Most organizations are aware of the need for change; however, the challenge lies in implementing strategies that stick. For a number of reasons, including a lack of understanding of deeper organizational issues or a failure to recognize the cross-functional implications of change, system-wide change often goes awry.

The purpose of this article is to examine how organizational culture influences the likelihood of success for change strategies, and to provide tools for the reader to apply within his or her organization. Evidence suggests that organization members are more inclined to embrace change when the organization's culture is aligned with the mission and goals of the company. Although senior management may espouse a set of values that they assume defines the organizational culture, the reality is that the way members perceive what is rewarded-and what they believe to be the underlying message-will constitute the "real," in-use culture of how things are accomplished. Therefore, we suggest that a cultural analysis be undertaken to facilitate the planning and implementation of organizational change.

Understanding culture can be useful in two ways. First, cultural insight provides awareness of the extent to which organization members are willing to accept change; and second, a cultural assessment is likely to determine the root cause of the problems that impede stronger performance.

Measurement of Organizational Culture

By investigating two disparate organizations-a family-owned business and a global manufacturing company-this article describes ways that management can utilize cultural assessments to increase the likelihood of success in managing change. The Goodwin Company, an organization specializing in contract packaging of household and automotive cleaning products, and Patagonia, a global brand supplying high-quality outdoor clothing and equipment, provide examples of this phenomenon. In both cases, the instrument used to assess culture was the Integrated Cultural Framework (ICF), which was adapted by the authors from the work of Hofstede and Kluckhohn and Strodbeck. The ICF has been used to analyze culture across a number of companies and industries and stands up to reliability and validity testing. The dimensions of measurement include:

- **Ability to Influence:** The extent to which organization members have an opportunity to influence decision making.
- **Comfort with Ambiguity:** The extent to which members are comfortable with uncertainty and risk taking.
- **Achievement Orientation:** The extent to which members are assertive, goal-directed, and achievement-oriented.
- **Individualism versus Collectivism:** The extent to which individual versus group loyalty exists.
- **Egalitarianism:** The extent to which equal opportunity exists for advancement.
- **Time Orientation:** The extent to which the organizational goal/mission is focused on values from the past, present, or future.
- **Space Orientation:** The extent to which the physical layout of the organization is public, private, or a mix of both.

The 35-item ICF survey was initially used to collect responses from organization members. Following the collection of survey data, an extensive number of interviews were carried out to provide more substantive information concerning organizational culture.

Goodwin Company

For several years, Goodwin Company, founded in 1922 by Thomas A. Goodwin, manufactured and sold its own line of household cleaning products. However, due to the competitiveness of the retail market, its focus shifted to contract packaging and distribution in the household, industrial, and automotive cleaning markets. Only the original product, Goodwin's Ammonia, maintains the Goodwin label. Still a family enterprise, Goodwin Company currently has approximately 300 employees and manufacturing and distribution facilities in Los Angeles, California, and Atlanta, Georgia.

In response to concerns about increased labor costs and stagnant revenues, an organizational culture study was launched to determine the appropriate change strategy. Forty-three members of the organization, including managerial and clerical staff, completed the ICF survey and 13 one-on-one interviews were conducted.

The results revealed the following key findings:

- **Ability to Influence:** The data indicated that the ability of employees to propose and implement change in the company was low. The interviews suggested that marginal regard for input had caused the staff to become discouraged and had reduced motivation for process improvements.
- **Individualism/Collectivism:** Although Goodwin Company espoused teamwork as a core value, feedback from the management teams in California and Georgia indicated a low level of trust among management, which resulted in a lack of collaboration among the managers.
- **Time Orientation:** The data showed that employees viewed the company as focused on the past and present while lacking a strategic plan for the future.

Proposed Structural Changes

Given the results of the study, three recommendations were presented to the management team:

1. Establish a strategic management group that meets weekly to address business challenges, coordinate travel between facilities, and find common ground to build trust.
2. Give employees, customers, and suppliers a voice and increase their ability to influence policy and procedures. Initiate an electronic comment box for employees, and implement surveys on customer service and supplier satisfaction.
3. Establish a company vision and mission statement to encourage a sense of ownership, and incorporate management teams from Atlanta and Los Angeles to spearhead this effort. Relocate artifacts, such as company photos from the early years and bottles from the product lines of the 1930s and 1940s, to both facilities in order to acknowledge the company's history and longevity and encourage teamwork between members of the two offices.

Outcomes

The establishment of the strategic management team proved to be very beneficial. By having the management team travel between facilities, the group developed a better understanding of the challenges at both locations, and they began to build a baseline of trust. The resulting collaborative effort of the team yielded two new contracts. In addition, Goodwin Company was certified by a major chemical manufacturer as a top facility in the nation, which resulted in requests for manufacturing proposals that would not have been possible without improvements in cooperation among regional managers.

Challenges

Goodwin Company was able to correlate changes that emerged in response to the organizational culture study; however, not all of the recommendations produced the desired results. For example, the customer service surveys did not yield the expected outcomes due to a lack of customer response. Additional customer contact will likely be necessary for future surveys to be effective. And although the recommendation to create a vision, mission, and values statement was originally well received, the management team eventually backed off the project, deciding that the company vision should come from its CEO.

Patagonia

Patagonia's corporate headquarters are located in southern California and the company has overseas offices in Japan and France. Revenues in 2007 totaled \$275 million and the firm currently has 1,300 employees worldwide, with 382 located in the corporate office. In 1966, founder Yvon Chouinard was dissatisfied with the conventional equipment used in adventure climbing and so he redesigned and manufactured almost every climbing tool to make each stronger, simpler, more functional, and environmentally friendly. From that operational base, Chouinard Equipment, which later became Patagonia, expanded to include outdoor and casual clothing and a line of underwear. The unique mission and focus of the organization was to make the best products, cause no unnecessary harm, and rely on the business model to inspire and implement solutions to the environmental crisis. Chouinard's management principles were captured in a self-published book, *Let My People Go Surfing: The Education of a Reluctant Businessman*.

Although the essence of Patagonia's initial philosophy has survived, increased growth and operational complexity have created challenges for the organization in its quest to remain committed to the mission. To better understand the underlying issues and develop a strategic direction, an organizational culture study was initiated. Using the ICF, 27 surveys were completed at the corporate office along with 15 one-on-one interviews with 4 senior managers and 11 mid-level managers from 8 departments.

Key Findings

- **Ability to influence:** The data showed that organization members felt they had a moderately high degree of opportunity to influence, but the inclusion of their input also led to a prolonged decision-making process.
- **Comfort with ambiguity:** Although the climate seemed to foster innovation and encourage risk taking, the lack of a systematic feedback process minimized the flow of ideas. In addition, the dilemma of attending to what appear to be dichotomous goals—attaining a profitable return while maintaining a commitment to environmentally safe products—created a challenge.
- **Individualism/Collectivism:** Patagonia attempted to build community by establishing an on-site childcare center, comprehensive health insurance, and a family setting. However, the company employs a large number of unique and creative independent-minded people, and in supporting innovation, it created a sense of individualism, as well as a limited incentive for teamwork.

Although Patagonia has been successful, the study indicated that to remain competitive, the organization needed to address the duality of encouraging individual creativity and promoting a collaborative work environment, particularly as this duality related to the corporate mission. In addition, it appeared that information flow and decision-making efficiency needed to be addressed.

Outcomes

The organizational culture study was presented to the Board of Directors, who recognized the need to enhance productivity by reinforcing the organization's mission and emphasizing the importance of a collaborative environment. The following structural changes emerged:

1. The human resources director was appointed to the senior management steering team to assist in the development of a strategic training initiative. Training courses were developed to provide skills directed toward facilitating performance management feedback, improving communication skills, and enhancing negotiation capability in dealing with suppliers.
2. A new employee training manual was created to better educate new hires regarding the organizational structure and the flow of product lines from development to sales. The purpose was to build teamwork and collaboration and to emphasize the company's core values related to quality, integrity, environmentalism, and the desire to not be bound by convention. In addition, Yvon Chouinard's book was presented to each hire with the hope of inculcating new members to the principles associated with the organization's mission.
3. All employees are now encouraged to participate in the Patagonia National Park protection program in Chile and Argentina to reinforce the importance of the mission statement and its meaning in their work. Employees receive a salary and all related expenses are paid by the organization during the three-week program.
4. The selection process for hiring new members was reviewed with a focus on measuring candidates' knowledge and skills, particularly their ability to work in a team.

Challenges

Shifting a culture that has to some extent moved away from the values established by its founder is always a challenge. A number of Patagonia's high performers have been successful because of their innovative talents. However, unless these individuals are also able to recognize the importance of collaboration, in the long term, the organization may not be able to respond in a timely manner to competitive pressure.

Lessons Learned

The article examined two distinct organizations, a family-owned operation and a global manufacturer, which utilized a cultural framework to determine underlying organizational issues. In both cases, the plans of action were system-wide and strategic. Although each company experienced favorable outcomes, considerable follow-up strategies must still be implemented before significant change is realized.

Cameron and Quinn claim that organizational improvements are unlikely without culture change as an initial step in the process. But culture change is illusive, requires lengthy interventions, and, for many organizations, is either too costly or too time-consuming, making successful transformation problematic. This study offers another perspective. Although culture change is necessary in creating and reinforcing organizational transformation, our position is that making necessary structural changes may serve as the initial intervention for shifting culture. At Patagonia, changes in how new members are socialized may bring about a commitment to organizational values and encourage a team-oriented

mindset. The impact of these initiatives is likely to result in norms that reflect organizational objectives. Goodwin Company's focus on enhancing collaboration, particularly among the management team, may result in continued dialogue between members, which will hopefully become embedded in their working relationships. In conclusion, the creation of structural initiatives that incentivize the desired ways of accomplishing goals may be more effective in responding to inefficiencies than a commitment to changing culture, which, over time, may naturally occur as shifts in behavior emerge.

About the Authors:

Mark Mallinger, PhD, is Associate Dean for full-time programs at the Graziadio School of Business and Management's full-time MBA Program at Pepperdine University. He is also a professor of applied behavioral science and has taught in the full-time, fully-employed, and executive programs. Dr. Mallinger is a management development consultant and has published works in a number of academic and practitioner journals.

Don Goodwin obtained his BS in Business Administration from Pepperdine University's Seaver College and his MBA from Pepperdine's Graziadio School of Business and Management. Don is a fifth-generation family member in the Goodwin Company, his family's contract packaging and distribution company, which began operating in 1922. Hired originally as the Director of Purchasing, his focus has changed to encompass overall responsibility for the operations of the company, specifically software integration and modernization. He is currently focused on the day-to-day operations of all departments and on helping to develop the strategic direction for the company's future.

Tetsuya O'Hara attended Doshisha University in Kyoto, Japan, where he received a bachelor's degree in economics in 1985. He was then employed at Teijin Limited, a multinational chemical company in Osaka, Japan, where he was in charge of sailcloth from 1985 until 1995, and contributed to America's Cup as an official sailcloth supplier. In 1992, he won the Most Valuable Employee Award at Teijin. In 1996, he moved his family to Connecticut to work for Dimension Polyant Sailcloth, Inc. As Executive Manager, he developed new materials, including polyester-laminated fabric for NASA's environmental research balloon. In 2003, he moved his family to California to join Patagonia, Inc., as Director of Material Development and Advanced Concepts. There he manages the raw material sourcing, development, new business concepts, and new technologies for the product lines, along with finding materials that are the most environmentally friendly. He received his MBA from Pepperdine's Graziadio School of Business and Management in 2008. The United States Patent Office approved his scientific inventions and granted him patents in January 2000 and July 2008.

You've spent time thinking outside the box
Do you know what's inside the box?

Think outside the box

Look at what's inside the box

Does supply chain security keep you up at night? Is the task of applying for C-TPAT too daunting? Or is it that you have neither the time nor the staff to tackle this project?

At Global4PL, we are able to stay up at night for you. With offices and experienced personnel in strategic geographical locations, we can assist with your origin sourcing initiatives and operations as they relate to, and even outside of C-TPAT. We can assist in helping you apply for, get certified, and even represent your company during the important validation phase of C-TPAT membership.

Our experts have helped various US importers in attaining C-TPAT membership. We will implement a program whereby you will gain full cooperation with your vendors, manufacturers, carriers, and various other parties. Even if you wish not to apply for C-TPAT, you'll have a set of recommendations to help improve the overall security of your supply chain.

For a free assessment of your company's state of readiness for C-TPAT, give us a call. We'll give you our honest opinion. And if you want to know more about other government programs or ways to help reduce your overall transportation spend, we'll be happy to oblige.

The Global Supply Chain Leaders Group

Mission:

The mission of the Global Supply Chain Leaders Group ("GSCLG") is to be the premier resource for senior level supply chain leaders who have extensive overall experience in business, particularly in the supply chain industry.

Who We Are:

GSCLG is an association of senior Supply Chain executives, magazine editors, selected consultants, and other Supply Chain thought leaders built on the foundation of local chapters, who come together to share and enhance their rich intellectual capital for the benefit of its members and their organizations.

Inside GSCLG:

Strategic direction for the organization is provided by GSCLG's elected Executive Board. GSCLG's standing committees are key to developing initiatives that fulfill the strategic goals of the association. Supporting the organization and fulfilling day-to-day management responsibility is GSCLG's leaders staff.

Join GSCLG:

Our membership includes CEOs, senior Supply Chain executives, prominent academicians, consultants, and other Supply Chain leaders. Learn more about GSCLG and what it can do for you clicking the link below.
